Section 3. HAZARDS IDENTIFICATION

Contact may cause mild eye irritation including stinging, watering and redness Eve

Contact may casue mild skin irritation inlcuding redness, and a burning sensation. Prolonged or repeated contact can worsen irritation by causing drying and cracking of the skin leading to dermatitis (inflammation) No harmful effects from skin absorption are expected

Inhalation (breathing) No data available. However inhalation is notan expected route of exposure

Ingestion (Swallowing) Low degree of toxicity by ingestions

Signs and Symptons: Effects of overexposure may inlcude irritation of the nose and throat, irritation of the respiratory tract, irritation of the digestive tract, nausea and diarrhea

Cancer: Inadequate evidence availabel to evaluate cancer hazard of this material. See Section 11 for carconogenicity information of individual components, if any

Target organs: No data available fo rthis material Developmental: No data available for this material

Pre-existing medical conditions: Conditions aggravated by exposure may include skin disorders

### **Section IV - FIRST AID MEASURES**

Eve if irritation or redness develops, move victim away from exposure and into fresh air. Flush eys with clean water If symptons persist, seek medical attention

SKIN Remove contaminated shoes and clothing and cleanse affected area(s) thoroughly by washing with mild soap and water. If irritation or redness develops and persists, seek medical attention

Ingestion (Swallowing) First aid is not normally required; however if swallowed and symptons develop, seek medical attention

### Section IV - FIRE FIGHTING MEASURES

Flash Point: 350 Deg C OSHA FLAMMABILITIY CLASS NOT APPLICABLE

LEL% NO DATA: UEL% NO DATA: NFPA FLAMMABILITY CLASS: NO DATA: AUTO IGNITION TEMP NO DATA **EXTINGUISHING MEDIA** 

Foam, dry chemical, water fog or carbon dioxide. Water or foam may cause frothing of materials above 100 deg C. Carbon dioxide can replace oxygen. Use caution when applying carbon dioxie in confined spaces

SPECIAL FIRE FIGHTING PROCEDURES

For fires beyond the incipient stage, emergency reponders in the immeidate hazard are should wear bunker gear. When the potential chemical hazard is unknown, in enclosed or confined spaces, or when explicitly required by DOT, a self contained breathing apparatus shoud be worn. In addition, wear other appropriate protective equipment as conditions warrant (see section 8)

Isolate immeidate hazard area, keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Move undamaged containers from immediate hazard area if it can be done with minimal risk. Water spray may be useful in minimizing or dispersing vapours and to protect personnel. Cool equipment exposed to fire with water, if it can be done with minimal risk Avoid spreading burning liquid with water used for cooling purposes

UNUSUAL FIRE AND EXPLOSION HAZARDS

This material may burn but will not ignite rapidly. Vapours are heavier than air and can accumulate in low areas If container is not properly cooled, it can rupture in the heat of fire

#### MATERIAL SAFETY DATA SHEET

TRADE NAME AND SYNONYMS

**GADIVA HT GREASE** 

### **Section 6 ACCIDENTIAL RELEASE MEASURES**

This material may burn but will not ignite rapidly. Keep all sources of ignition away from spill/release, isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Weak appropriate protective equipment including respiratory protection as conditions warrant (see section 8)

Prevent spilled mateiral from entering sewers, storm drains, other unauthorized drainage systems and natural waterways Dike far ahed of spill for later recovery and disposal. Spilled material may be absorbed into an appropriate absorbent mateiral. Notify fire authorities and appropriate federal, state and local agencies. Immediate cleanup of any spill is recommended. If spill of any amount is made into or upon navigable waters, the contigous zones, or adjoining shorelines, notify the national response center, if any

### 7. HANDLING AND STORAGE

Handling: Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D 4276 and 29 CFR 1910-146. The use of appropriate respiratory protection is advised when concentrations exceed any established exposure limits (see section 2 and 8)

Do not wear contaminated clothing or shoes. Use good personal hygiene practices

Empty containers retain residue and may be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, sparks or other sources of ignition. They may explode and cause injury or death Emptry drums should be completely drained, properly bunged, and promptly shipped to the supplier or a drum reconditioner. All containers should be disposeed off in an environmentally safe manner and in accordance with governmental regulations.

high pressure injectino of hydrocarbon fuels, hydraulic oils or greases under the skin may have serious consquences even though no symptoms or injury may be apparent. This can happen accidentally when using high pressure equipment such as high pressure grease guns, fuel injection equipment or from pinhole leaks in tubing of high pressure hydraulic equipments.

Befor ework on or in tanks which contain or have contained this material, refer to OSHA regulations, ANSI Z 49.1 and other refernces pertaining to cleaning, repairing, welding or other contemplated operations

Storage: keep containers tightly closed. Store only in approved containers. Use and store this mateiral in a cool, dry well ventilated areas away from heat and all sources of ignition. Storage temperatures above 45 deg C may lead to thermal decomposition, resulting in the generation of hydrogen sulfide and other sulfur containing gases. Keep away from incompatiable mateiral (See section 10) Protect containers against physical damage

## SECTION 8. EXPOSURE CONTROLS/PERSONNEL PROTECTION

Engineering controls: if current ventilation practises are not adequte to maintain airborne concentrations below the established exposure limites (see section 2), additional engineering controls may be needed

Personnel Protective Equipment (PPE)

Respiratory: a NIOSH certified air purifying respirator with a type 95 (R orP) particualte filter may be used under conditions where airborne concentrations are expected to exceed exposure limits (see section 2)

Protection provided by air purifying respirators is limited (see manufacturer's respirator selection guide). Use a NIOSH approved self contained breathing apparatus (SCBA) or equivalent operated in a pressure demand or other positive pressure mode if there is potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection

A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z 88.2 requirements must be followed whenever workopace conditions warrant a respirator's use

Skin: The use of gloves impervious to the specific material handled is advised to prevent skin contact and possible irritation (see manufacturer's literature for information on permeability)

Eye/Face: Approved eye protection to safeguard against potential eye contact, irritation or injury is recommended. Depending upon conditions of use, a face shield may be necessary

# **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

Note Unless otherwise stated, values are determined at 20 xeg C and 760 mm Hg (1 atm)

Appearance Black pH Not applicable Physical Form Semi solid Vapour pressure, mm hg <0.01

Physcial Form Semi solid Vapour pressure, mm hg Odor Characteristic petroleum Vapour density, air=1 >5
Odor Threshold No data Boiling point No data

solubility in water Insoluble Bulk density 8 terms lbs/gal Partition coefficient (n-octanoo/water) No data Specific gravity 0.92

percent volatile Negligible Evaporation rate (nBuAc=1) <0.01

Flash Point: 350 deg C as per COC LEL,% and UEL,% No Data

Autoignition temperature: No data

### **SECTION 10 STABILITY AND REACTIVITY**

Solubility Stable under normal ambient and anticipated storge and handling conditions of temperature and pressure

CONDITIONS TO AVOID Extended exposure to high temperatures can cause decomposition MATERIALS TO AVOID (INCOMPATIBLE MATERIALS) Avoid contact with acids, strong oxidising agents HAZARDOUS DECOMPOSTION PRODUCTS: Combustion may yield carbon, nitrogen, sulfur, phosphorous, and zinc oxides. Hydrogen sulfide and alkyl mercaptans may also be released. Thermal decomposition may produce hydrogen sulfide and other sulfur containing gases at temperatures above 45 deg C HAZARDOUS POLYMERISATION WILL NOT OCCUR

### Section 11 TOXICOLOGICAL INFORMATION

Chronic Data Lubricant Base Oil (Petroleum) CAS: VARIOUS

Carcinogenicity The petroleum base oils ocntained in this product have been highly refined by a variety of

processes including solvent extraction, hydro treating, and dewaxing to remove aromatics and improve performance characteristics. Allof the oil smeet the IP 346 criteria or less than

3% PAH's and therefore none are listed as a carcinogen by NTP, IARC or OSHA

## **Section 12 ECOLOGICAL INFORMATION**

Not evaluated at this time

## Section 13; DISPOSAL CONSIDERATIONS

This material, is discarded as produced, is not a RCRA Listed hazardous waste. However it should be fully characterized for toxicity prior to disposal (40 CFR 261). Use which results in chemical or physical change or contamination may subject it to regulation as a hazardous waste. Along with propertly characterizing all waster materials, consult state and local regulations regarding the proper disposal of this material Container contens should be completely used and containers should be emptied prior to discard. Container rinsate could be considered a RCRA hazardous water and must be disposed of with care and in full compliance with federal, state and local regulations. Larger empty containers, such as drums, should be returned to the distributor or to a drum reconditioner. To assure proper dispoal of smaller empty containers, consult with local regulations and disposal authorities

## **SECTION 14 TRANSPORTATION INFORMATION**
